	Product	Size	Description
	<b>Vortex Energiser</b>	18 cm height, 18cm greatest diameter	The Original Vortex Water Energiser™, when attached to the domestic water inlet pipe, energises all the water in the house – instantly and constantly. There are no further maintenance requirements. Finishes available are; <ul style="list-style-type: none"> <li>■ polished copper</li> <li>■ silver plated</li> <li>■ gold plated</li> </ul>
	<b>EMF Harmoniser</b>	Large 18cm x 18cm  Small 13cm x 13cm	The EMF Harmoniser™ is a version of the Vortex Energiser™, designed to be freestanding and has been developed for sources of electromagnetic radiation, such as computers, TV's and microwave ovens. Finishes available are; <ul style="list-style-type: none"> <li>■ polished copper</li> <li>■ silver plated</li> <li>■ gold plated</li> </ul>
	<b>Personal Harmoniser</b>	Phi 5 x 2.5 cm 3.3 x 1.6 cm  Triple 5 x 5 cm 4 x 4 cm  Four 5.3 x 4.1 cm	The Personal Harmoniser™ is a portable device providing personal protection from electromagnetic radiations. It is especially beneficial to users of mobile phones, but will protect from any kind of electromagnetic pollution that fills our environment. It reduces electromagnetic as well as geopathic stress. It is supplied with cord and makes beautiful dual purpose jewellery. Finishes available are; <ul style="list-style-type: none"> <li>■ polished copper</li> <li>■ silver plated</li> <li>■ gold plated</li> <li>■ Tri-metal (both silver and gold plated, either on top)</li> </ul> Many people report that the silver and gold plating alters and strengthens the etheric energy.
	<b>Earrings</b>	1.7 x 1cm	The CIR Earrings are made from copper tubing and contain highly energised, imploded water. Finishes available are; <ul style="list-style-type: none"> <li>■ silver plated</li> <li>■ gold plated</li> </ul> These earrings are made for pierced ears as standard. On request they can be provided as clip-on earrings.
	<b>The CIR Water Egg</b>	28 cm height x 19 cm greatest diameter  4.5 litre capacity	We have learnt from Viktor Schauberger's writings that it is very important to store liquids in opaque egg shaped containers. Because there are no corners and crevices there is no stagnation and disease causing bacteria are much less likely to breed. Constant convection and spiralling movement keep liquids fresh, cool and healthy.  The Water Egg™ is beautifully hand crafted from glazed porcelain clay and comes complete with tap, stand and lid. It will store one gallon (4.5 l) of liquid. A Harmoniser is set in bees wax within the lid and ensures that whatever you store in it becomes energised.

	<p><b>The Water Amphora</b></p>	<p>615 mm high x 450mm greatest diameter. (830mm high when on stand)</p> <p>50 litre capacity</p>	<p>Living Water Flowforms Australian made, and Callum Coats designed, porcelain Water Amphora. This beautiful egg will not only maintain the vitality of the contained water.</p> <p>The AMPHORA is beautifully hand crafted from porcelain clay and comes complete with hands free push tap, stand and cork lid. An Implosion Research silver plated Personal Harmoniser is also provided to ensure that whatever you store in it becomes energised.</p>
	<p><b>Cunninghame Dowsing Rods</b></p>	<p>18cm x 9cm</p>	<p>CIR friend and mentor John Cunninghame, a gifted dowser and long standing member of the British Society of Dowsers, approached CIR recently regarding the manufacturing of his dowsing rods. What makes these L-shaped rods special is the way they swing freely. They are made from brass.</p> <p>Dowsing has been used for centuries to find ground water and minerals and has many applications in subtle energy work. Dowsers generally find it easy to test the energy fields of our products.</p>
	<p><b>Wands of Horus</b></p>	<p>151cm x 28cm</p>	<p>We have available from Russia, Valery Uvarov's Wands of Horus.</p> <p>In Ancient Egypt the Wands of Horus were filled with quartz crystals of differing sizes. The size of the crystals depending on the task they were seeking to accomplish, the state of the health and energy system of the user.</p> <p>Types available include; Mono (three types of monocrystalline quartz), Crystal (crystals of quartz), Quartz (three types with different grades of fine-grain quartzites), Kont (carbon and ferromagnetic material) and BJA.</p>
	<p><b>Biostimulator Insoles</b></p>	<p>European shoe sizes available.</p>	<p>The biostimulator insoles have copper inserts for the right foot and zinc for the left foot. The potential difference created using the insoles effectively harmonizes the BA-KA energy flows, encourages the normalization of the pH level of the blood and improves its fluidity, as well as stimulating the energy projections of the organs and systems that come out on the soles of the feet.</p> <p>Under the influence of the biostimulator a general increase in the energy of the organism is observed, together with activation of the circulation in the blood system of the spine and the prostate gland, which are closely connected with the projection of the first energy centre.</p>
