The Personal Harmoniser™, is a portable device boosting the immune system and also providing personal protection from electromagnetic radiation. It is especially beneficial to users of mobile phones, but will protect from any kind of electromagnetic pollution that fills our environment. It reduces electromagnetic as well as geopathic stress.

It is supplied with cord and makes beautiful multi purpose jewellery. CIR have many testimonies and scientific reports confirming that the Personal Harmoniser strengthens the body's own etheric energy.

The different versions are all made from copper tubing and are filled with CIR's imploded water, which is what makes them work the way they do. Therefore, any version, whether copper, silver-plated or gold-plated will have the same basic effect. Furthermore, the different metals have their own intrinsic frequencies, which add to the basic effect of the products.

When choosing the right metal, we generally advise to go with your intuition. If you have no affinity to a particular metal, go with the metal you like best.

The following finishes are available;

- **Copper** - The standard version is manufactured from copper and provides a general balanced energy.
- **Silver** - The silver version is manufactured from copper and silver plated.
The silver energy is more of a female and nurturing energy. Generally women are more attracted to this energy than men, but this should be a rough guide only.
- **Gold** - The gold version is manufactured from copper and gold plated.
The gold energy is more of a male and healing energy.
- **Tri-metal** - This version is manufactured from copper and is then both silver and gold-plated, with either silver or gold on top. These are available as a special order. The tri-metal combines the nurturing and healing energy and has the edge on the healing front. This makes the tri-metal harmoniser particularly suitable for chronically sick people.
- **Platinum** - This version is manufactured from copper and is then platinum plated. All types and sizes of Personal Harmoniser are available platinum plated.

Phi

This is the Phi which is based on the Golden Section and is one of our most effective designs.

The Phi is available in two sizes, the standard size is 5cm x 2.5cm. A smaller size is available for children and this is made from a smaller diameter copper tube. Size is 3.3cm x 1.6cm

Triple

The Triple Personal Harmoniser can be worn and used just like the Double Personal Harmoniser. The extra spiral makes it slightly stronger. Energetically, the main difference between the double and triple version is that the triple is predominantly female, irrespective of the type of metal plating.

The triple is available in two sizes, large 5 x 5 cm and small 4 x 4 cm. Women generally prefer the small size.

Four Spiral

The Four-Spiral Personal Harmoniser, like all our Harmonisers, contains highly energised, imploded water. It is made from the same size copper tubing as the small Triple Personal Harmoniser. When CIR first experimented with this four-spiral design they were struck by its balance and beauty; four spirals of equal dimensions, incorporating the synergy and balance between the masculine and the feminine. Initial kinesiological tests have shown that out of all of the Personal Harmonisers, the Four-Spiral is the most effective at providing personal protection from electromagnetic radiation/pollution. Size 5.3cm long, 4.1cm wide

Leather Cased

This version, also known as the mobile phone harmoniser is a copper personal harmoniser bound and sealed in leather and is convenient to slide into the case of a mobile phone or to carry it in a shirt or trouser pocket.
